Current Projects 2025

Don Carter State Park in Gainesville GA

Replacing bridge floor boards on trail bridges at Don Carter State Park

In 2024, CTHA members worked alongside park staff to remove and replace boards on 2 trail bridges.

On March 8, 2025, CTHA members worked alongside park staff and other users to replace boards on 2 additional bridges. Also, CTHA contributed funds as did the Friends Group to purchase the lumber for the project. After the work was completed, CTHA provided a hearty lunch for all the volunteers and for the park staff.

Our next planned workday at this site is planned for the Fall to replace boards on 2 additional bridges. When the park sets a date, we will put out an announcement and request for volunteers.

Jake and Bull Mountain Trail System in the Blue Ridge District of the Chattahoochee National Forest

A trail realignment of the Bull Mountain Connector (FS223F) has been approved and CTHA has hired a contractor to do the machine work. Expect an update for dates in the Fall when volunteer labor will be needed to complete the project.
